Thanks very much Brian, for taking the time to provide comments on behalf of FMCBC members. I'm really pleased to receive your submission, and a letter format is good to have from key stakeholders like you. We had an excellent response to the public on-line survey (it is closed now), so we've got some good initial input to help us understand the broad interests out there. This will really help as we engage in discussions with First Nations, and start wrestling with the key management issues, etc. We'll be in touch as the process continues. Thank you.

Sincerely,

Vicki Haberl
